(800) 707-4621

FOR IMMEDIATE RELEASE – February 27, 2020 – (Columbus, OH) – American Health Packaging has voluntarily recalled eleven (11) lots of Ranitidine Tablets, USP 150 mg, 100 count Unit Dose Blisters to the consumer level due to the potential N-Nitrosodimethylamine (NDMA) amounts above levels established by the FDA. This recall was initiated in response to the recall by the manufacturer (Amneal Pharmaceuticals, LLC), which included affected lots that were repackaged by American Health Packaging.

Risk Statement: NDMA is classified as a probable human carcinogen, a substance that can cause cancer, based on laboratory testing. NDMA is also a known environmental contaminant found in water and foods, including meats, dairy and vegetables. No reports of injury or adverse events to date.

Ranitidine is a histamine-2 blocker, which decreases the amount of acid created by the stomach. Prescription ranitidine is approved for multiple indications, including short-term treatment for active duodenal ulcers, maintenance therapy for duodenal ulcer patients, treatment of pathological hypersecretory conditions, short-term treatment of active, benign gastric ulcers, maintenance therapy for gastric ulcers, treatment of GERD and treatment of endoscopically diagnosed erosive esophagitis.

American Health Packaging has not received any reports of adverse events that have been confirmed to be directly related to this recall.

Product was distributed Nationwide to Wholesalers for use in hospital settings.
