

As a leading manufacturer of serialized, barcoded unit dose oral solid, oral liquid, and inhalation medications, we rigorously support patient safety and pharmacy efficiency initiatives with our growing product formulary. AHP's product catalog is an easy way to reference our full portfolio of nearly 600 SKUs available nationwide through partner GPOs and wholesalers.

AHP's reputation for quality is supported by more than 30 years of broad manufacturing expertise. Our FDA-registered facility fully adheres to current good manufacturing practices guidelines and is licensed by the Drug Enforcement Administration to package Schedule II to V controlled substances.

Following years of success and leadership in the production of unit dose oral solids, AHP expanded its offering in 2017 to include liquid unit dose cups.

Liquid unit dose products come in multiple pack sizes to provide flexibility in managing local inventory and feature:

- Pull-tab labels that promote easier opening and product administration
- Thick-gauge cups with excellent label seal integrity that aid in avoiding costly damage and cleanup
- Easily legible labels that aid in selecting correct products from the pharmacy shelf
- Cups and storage trays designed to optimize limited storage space

In 2019, we began offering unit dose inhalant products that feature:

- Individually wrapped and barcoded vials that support effective inventory management while mitigating waste
- Right-sized cartons and pouches suited for limited storage space
- Four available inhalation SKUs

What is a GTIN?

GTIN is an acronym for Global Trade Identification Number and is a 14-digit number. The GS1 assigns a prefix to a registered company which is used to create an item number. For drug products, the prefix includes the FDA assigned labeler code:

GS1 prefix	NDC labeler code	GS1 prefix	NDC labeler code
00360687	60687	00368000	68000
00368084	60684	00368002	68002
00362584	62584		

AHP's product catalog includes Dietary Supplements. For these products, the GS1 has assigned a UPC-style prefix. AHP has the following GS1 assigned non-drug prefixes:

GS1 prefix	AHP ID prefix	GS1 prefix	AHP ID prefix
00858526005	58526	0814301020	14301

If your product database does not allow the storage of the 14-digit GTIN, programming will be required by your product data provider to extract the NDC or AHP ID from the GTIN. The format of the three-segmented numbers are as follows:

10-Digit NDC	11-Digit NDC	11-Digit AHP ID
5-3-2	5-4-2	5-4-2

What does the data reference mean

The encoded data follows GS1 specifications. There are two-digit Application Identifiers (AIs) that will help GS1 compliant systems identify the information being read. AHP uses the following AI codes:

GTIN (14-digit)	Exp date (YYMMDD)	Lot number (6 to 14 digits)	Serial number (1 to 12 digits)
01	17	10	21
